

## **Comprehensive Windows Protection**

Security Manager – AV Defender uses advanced technology to protect your Windows devices from the latest security threats. Bitdefender technology consistently wins independent industry tests.

## **Simplified Security Management**

Designed specifically to secure the complex IT environment of modern connected companies, AV Defender provides:

- Simplified exclusion management with organizational and system level Global Exclusions
- Streamlined deployment with rule-based automated configuration, deployment, and migration of your specific environment.
- Automatic removal of the most previous AV products
- Increased visibility of anti-virus activity with comprehensive security events
- Enhanced monitoring with a dashboard-style view of anti-malware activity
- Robust reports to quickly and dynamically provide insight into your environment

## **Simple Rollout**

Replacing any widely used system can be daunting. Security Manager – AV Defender removes the hassle by deploying at the click of a button and automatically uninstalling most legacy endpoint clients. Additionally, N-Central allows us to schedule deployment and customer-system reboots.

## **Comprehensive Feature Set**

AV Defender provides more than just antimalware protection. It includes a fully feature two-way firewall, intrusion detection, anti-phishing, web filtering, and user control. This comprehensive functionality is essential in blocking increasingly diverse threats from infecting end-user systems and server endpoints

## **Security Manager- AV Defender in a nutshell:**

- ✓ Anti-Virus and Anti-Spyware Protection
- ✓ Personal Firewall on all client endpoints
- ✓ Intrusion prevention
- ✓ On-Demand Behavioral analysis
- ✓ Rule-Bases system behavior blocking
- ✓ Malware Audit & disinfection service
- ✓ 2007 WildList® proactive detection

Advantages	Feature Details
<p><b>Protect critical and sensitive information:</b></p> <p>Allows you to effectively guard your most valued assets by providing a security solution that will protect information on all network endpoints</p>	<p><b>Comprehensive Protection:</b></p> <p>Delivers an all in one security solution, including anti-virus, antimalware, personal firewall, and host intrusion prevention.</p>
<p><b>Increase productivity:</b></p> <p>Reduce interruptions or downtime in your network by reducing the use of unproductive or banned applications.</p>	<p><b>Configuration Management:</b></p> <p>We can configure all of the settings that then will be applied to multiple devices upon installation of the antivirus, significantly decreasing downtime.</p>
<p><b>Reduce operational complexity and lower costs:</b></p> <p>By delivering complete endpoint security in a single solution we can eliminate the need for multiple security tools that use multiple consoles.</p>	<p>Around the clock updates:</p> <p>We automatically download and install the latest detection updates even if the device is outside of your business network. This provides you with the maximum protection anytime, anywhere.</p>
	<p><b>Multi-Stakeholder Reports:</b></p> <p>We communicate vital information to executive, management, operational, and technical contacts that wish to be informed as well as auditors</p>
	<p><b>Real-Time incident and Alert monitoring:</b></p> <p>Using the centralized monitoring agent we are able to unify all the information from the entire network and alert either your on-site technician or your Simplified Technology account representative with either an email or text notification.</p>
	<p><b>Easy Deployment:</b></p> <p>We provide simple remote deployment by device or entire group of devices that ensures a bandwidth-friendly mass rollout and signature file updates. Existing will be removed automatically in most cases.</p>
